Soybean candles

Advantages of soybean scented candles:

- When burning, they produce up to 90% less soot than paraffin candles
- They burn up to 50% longer than classic candles
- They are non-toxic and safe for children and pets
- They burn with a clean and even flame
- Due to the lower melting point of the soy wax, their fragrance is released faster and fills the entire space with an intense aroma

Craft candles

We opted for a simple, versatile design, natural wax and a functional, handy jar. This gives the candle an artisan feel and is environmentally friendly (recyclable or reusable at home).
